Data Center Virtualization

Today's Data Center provides more services and has more demands. It also is capable of being more flexible than ever before with virtualization technologies and cloud computing as well. Here at Platinum Solutions Group, we have experts with decades of experience in the design, implementation, operation and troubleshooting small & Medium Business, Large Enterprise, Government, and Service Providers needs.

Our Cisco CCIE expert consultants can assist at any level of your business needs. From Pre-Sales Design, Re-Design, Implementation, Complex Configuration, Operation and Maintenance, Troubleshooting, and Day 2 support. We also provide end – to – end training beginning with the end-user all the way to expert if desired, keeping in mind a focus on your needs. We believe whole heartedly in the importance of knowledge transfer after the implementation of new services.

Simplifying the Data Center

- Transparent Mobility across any Data Center

Data Center Optimization

- Optimizing your SAN and Ethernet networks to provide consistently high levels of performance and agility to fit your data center infrastructure needs.
- Enhancing Virtual Application's through using Cisco's Application Control Engine.
- Virtualization optimization through the integrations of Cisco Networks with VMware Virtualization technologies. Providing a quicker return on investment (ROI) and lowering your TCO while providing better business agility than ever before.
- Thru technology enhancements such as Cisco's Energywise technologies, reduce power consumption allowing you to have a smaller energy footprint and reducing business costs associated with running your Data Center.

Investment Protection

- Let us help you utilize the best technologies today so you have a quicker ROI and reduce your TCO while giving you the optimal services to provide the agility to meet your ever changing business needs in the Data Center.

And Much More!

When working with Data Center solutions, we believe in a 5-step process; Plan, Design, Implement, Operate, and Optimize. Platinum Solutions Group can tailor this model to accommodate any customer solution needed.
