Service Provider Solutions

Our Cisco CCIE Service Provider consultants can assist at any level of your business needs. From Pre-Sales Design, Re-Design, Implementation, Complex Configuration, Operating Maintenance, Troubleshooting, Day 2 support. We also provide end – to – end training beginning at the end-user level. We believe whole heartedly in the importance of knowledge transfer after the implementation of new services.

Within the Service Provider Solutions business, our engineers come with a wealth of experience and certifications to include:

ISP Services

- Interior routing optimization, design and redesign
- Advanced BGP architectures and services
- IPv6 infrastructure

Next-Generation Network Infrastructure

- Design and Implementation of IP/MPLS infrastructure
- Network as a Service
- IPv6 infrastructure
- Broadband infrastructure
- Supporting infrastructure for IPTV
- Network Operations

And Much More!

When managing Carrier/Service Provider solutions, we believe in a 5-step process; Plan, Design, Implement, Operate, Optimize. Platinum Solutions Group can tailor this model to accommodate any customer solution needed.
